2D Crossy Road

Objective

- The objective of this game is to try to get as high of a score as you can. The score is dependent on how many “blocks” you move forward. There will be moving obstacles, such as cars that you have to avoid. The player will be able to move forward, backward, and side to side (by using the arrow keys) to avoid these obstacles. As the player gets a higher score, there will be more obstacles, and these obstacles will move faster

Essentials

- Moving avatar
- Obstacles that block path and move
- A score count
- An environment that moves with the player (never ends)

Anticipated

- Background Music
- Sound Effects
- Different Environments with different types of obstacles
